Dear Customer

Impressions has now been established and selling software in North America for nearly a year, and I want to thank all of you for your support and help. I have learned enormous amounts about what makes games work for you, and what we need to do to give you the games you want to play. I want to especially thank all the users of Prodigy who contributed to discussions about product quality.

*For all of you who bought the initial **Air Bucks**, I hope that we have shown what customer support and our commitment to excellence really mean, with the free upgrades. I now believe that **Air Bucks** is a truly excellent product, and I know that many thousands of you agree. **Caesar** also should help prove that our commitment to excellence is real - not an empty slogan.*

Let me say once again that we are here because we want to make games that people want to play. We specialize in strategy games - because those are the games we love to play ourselves. Our philosophy is to have fun, and ensure that fun oozes out of our games. Please, please continue to write in and help us get even better. We have come a long way - but with your help, we'll go even further and give you even better games. I hope you'll like the new games inside these pages. Enjoy!

Create your capital city from scratch, choose your buildings from the breadth of Roman culture and architecture, and make planning and administrative decisions to make your city a better place to live. Create trade routes between your city and other towns, and build Imperial highways to connect you with the rest of the empire. Fortify your cities with walls and towers, but should your defenses fail, you must command legions to crush the hostile barbarian tribes!
